09	**One pair** Two cards of the same rank.	A♥ A♠ 9♣ 6♦ 3♠	1 in 2.4
10	**High card** None of the above: your highest card plays.	K♦ J♠ 8♥ 4♣ 2♦	1 in 2.0

Exact odds, counted over all 2,598,960 possible five-card hands. That is where the order comes from: the rarer hand wins.

When two players have the same hand

1 The kicker decides

You	K♦	K♠	A♠	9♣	7♦	WINS
Opponent	K♦	K♣	Q♥	9♣	7♦	

Kings against kings: the next highest card settles it. Your ace beats their queen.

2 Suits never break a tie

♠ = ♥ = ♦ = ♣

All four suits are equal, so spades don't beat hearts. A suit only matters for making a flush.

3 Split pot

You	10♥	9♣	8♦	7♠	6♥	½
Opponent	10♠	9♣	8♦	7♠	6♦	½

If both five-card hands match rank for rank, even in different suits, the pot is split evenly.
